

1997 S&V Index

This is the cumulative index for Volume 31 of Sound and Vibration, January 1997 through December 1997. The index is divided into three parts: a chronological index of major editorial items and authors in order of publication in each issue; a subject index citing month of publication in each issue; and an authors index citing month of publication.

The editorial items listed in the chronological index include: Edito-

rials, S&V Observer items of significant interest, and all articles. These listings are cross-referenced to the subject and author indexes.

Limited quantities of back issues of S&V are available and photocopies of all articles or other editorial items can be provided. For information on availability and cost, contact: Sound and Vibration, P.O. Box 40416, Bay Village, OH 44140; (440) 835-0101; FAX (440) 835-9303; e-mail sv@mindspring.com.

PART 1: Chronological Index

January 1997

Old Lang's Sign, *George Fox Lang*
The "Golden S&V" Awards – The Best of the Best, *Jackson Krueger Mowry and George Fox Lang*
Thirty Years of FFT Analyzers . . . , *Sri Weleratna*
The Analysis of Nonstationary Signals, *Svend Gade and Klaus Gram-Hansen*
The Changing Sound of Education, *Robin M. Towne and Karen L. Anderson*
Is It a Mode Shape, or an Operating Deflection Shape?, *Mark H. Richardson*
Product Durability Engineering – Improving the Process, *Paul Weal, Christophe Liefooghe and Klaus Dressler*
Perspectives on Active Noise and Vibration Control, *E. F. Berkman and E. K. Bender*
Sound and Vibration 30-Year Index

February 1997

Solving for the Unknown, *Richard H. Tuft*
Radio Frequency Interference on Internally Amplified Accelerometer Signals, *Fred Schloss*
New Sensor Mounting Technique for Machinery Vibration Monitoring, *Gene Bradbury and Eric Saller*
Vibration Testing of Heavy Machinery Structures, *Michael M. Landgraf*

March 1997

The COTS Software Issue Revisited . . . The Power of Positive Complaining, *Strether Smith*
Helicopter Vibration and the Boeing CH-47 "Chinook", *Tom Rosenberger and Gary Foss*
The History of the Accelerometer, *Patrick L. Walter*
Advances in the Control and Calibration of Transducer Installations, *Bernard Ginn and Carl Nielsen*
Dynamic Measurement Instrumentation Buyer's Guide

April 1997

Reliability – Past and Present, *Gregg K. Hobbs*
Portable Data Acquisition System Reduces Testing Time for Mining Equipment, *James Flechhaus*
Electrodynamic Shaker Fundamentals, *George Fox Lang*
A New Procedure for Selecting Modal Testing Reference Locations, *Peter Avitabile and David Haselton*

May 1997

Testing Is Alive and Well and Living In Industry . . . or Exit the Fair Linearity Act, *Håvard Vold*
Dynamic Analysis Guides Truck Fairing Design
Sound Quality Tools for NVH Design, *Gabriella Cerrato, Alun Crewe and Roger Williams*
Multi-Axle Order Tracking with the Vold-Kalman Tracking Filter, *Håvard Vold, Henrik Herlufsen, Michael Mains and Dan Corwin-Renner*
A New Methodology to Support an Optimized NVH Engineering Process, *Dirk Roesems*

June 1997

Just Give Me Something That Works, *Nelson L. Baxter*
Identifying and Eliminating Steel Mill Vibration Problems, *Barry Ardell and Roger Koch*

Dynamic Stiffness Testing and Its Applications in Machine Tools, *Ming Xu and John R. Birchmeier*
Noise and Vibration Control with Robust Vibration Suppression, *Kenneth G. McConnell and Chad E. Bouton*

July 1997

Human Exposure to Whole-Body Vibration and Medical Therapy, *Donald E. Wasserman*
Hemi-Anechoic Acoustic Test Facility for Large Water Chillers, *Robert Staley*
Translating Acoustical Requirements Into Architectural Details, *Ewart A. Wetherill*
Sound Transmission Loss Prediction of Double-Wall Barrier Assemblies, *Richard E. Wentzel and Pranab Saha*
Buyer's Guide to Products for Noise and Vibration Control

August 1997

What are you waiting for?, *Mark C. Rodamaker*
Measuring Speaker-Diaphragm Motion to Improve Sound of Two-Way Radio Systems, *David Yeager and Richard Benson*
The Development of Autonomous Structural Modal Identification, *Richard S. Pappa, Stanley E. Woodard and fer-Nan Juang*
A Poor Man's Approach for Testing Surface Damping Treatments, *John O. Lassiter*

September 1997

The Bottom Line is the Bottom Line, *John S. Mitchell*
Failure Analysis and Repair of a Radar Antenna, *Kevin Bailey*
Understanding and Solving Mechanical Instabilities, *Paul A. Zaffiro*
Failure Analysis of Centrifugal Pumps, *Barry L. Ardell*

October 1997

Some Thoughts on the Experimental Validation of Analytical Tools, *Raj Singh*
Innovative Solar Panels Pose Many Test Challenges, *Dick Dumke and Kurt Von Goerlitz*
Squeak & Rattle Testing of Automotive Instrument Panels, *William Rusen, Edward Peterson, Richard McCormick and Richard Byrd*
Statistical Energy Analysis, *Eric E. Ungar*
Buyer's Guide to Dynamic Testing Equipment

November 1997

Some Things Still Bother Me, *John L. Frarey*
Seismological Monitoring of the Hayward Fault, *Richard Clymer and Tom McClosky*

Use of Vibration Measurements to Detect Local Tooth Defects in Gears, *M. J. Brennan, M. H. Chen and A. G. Reynolds*
A Simple Way to Measure Mass Moments of Inertia, *John B. Andriulli*

December 1997

Establishing Acoustical Standards for Classrooms, *Jerry G. Lilly*
Hemi-Anechoic Chamber Utilizes Perforated Metallic Anechoic Wedges
The Acoustic Torpedo, *Laymon Miller*
Acoustical Upgrading – Campbell United Methodist Church, *Ewart A. Wetherill*

Dynamic Sound Testing of Earth Moving Machinery, *Patrick Glibert, Mark Sutherland, David Copley and David Sanderson*

1997 S&V Index

PART 2: Subject Index

Accelerometer history	Mar
Accelerometers	Feb
Acoustic torpedo history	Dec
Active noise & vibration control	Jan
Anechoic chambers	Jul-Dec
Architectural acoustics	Jul-Dec
Awards	Jan
Classroom acoustics	Jan
Damping treatments	Aug
Data acquisition	Apr
Durability engineering	Jan
Dynamic stiffness testing	Jun

Failure analysis	Sep
FFT history	Jan
Finite element analysis	May
Gear vibration	Nov
Helicopter vibration	Mar
Index	Dec
Index, 30 Year	Jan
Instrumentation buyer's guide	Mar
Loudspeaker measurements	Aug
Machinery noise	Dec
Machinery vibration	Feb-Jun
Materials buyer's guide	Jul
Mechanical instabilities	Sep
Modal identification	Aug
Moments of inertia	Nov
NVH engineering	May
Operational deflection shapes	Jan
Order tracking	May
Pump troubleshooting	Sep
Seismic monitoring	Nov
Sensor mounting	Feb
Shaker fundamentals	Apr
Signal analysis	Jan
Sound barriers	Jul
Squeak & rattle testing	May
Statistical energy analysis	Oct
Stepper motors	Jun
Test reference identification	Apr
Testing equipment buyer's guide	Oct
Transducer signal conditioning	Mar
Vibration testing	Oct

Bring your laboratory with you!

Now you can have laboratory power on-site. The battery-operated dual channel real time analyzer NOR-840 has all the features you need from an acoustical laboratory.

Need to measure sound and vibration levels in octave bands, you say? Or, maybe you want 1/3, 1/12 or 1/24 octave bands for finer analysis? ... or would dual channel FFT be the thing? What about sound intensity, reverberation time and MLS (Maximum Length Sequence)?

And while you sit there on-site, why not make your reports on your favorite word-processor incorporating NOR-840 screen-dumps as well as including graphs from your favorite spreadsheet program?

It's all there in a single instrument, the NOR-840—the analyser with a built-in personal computer.

Call today for details!

SCANTEK, INC.
916 Gist Ave., Silver Spring, MD 20910
Phone 301/495-7738, FAX 301/495-7739

Outside U.S.: Norsonic AS, P.O. Box 24,
N-3420 Lierskogen, Norway
Phone +47 3285 8900, FAX +47 3285 2208

Some of the described features are optional,
contact your local representative or the factory for details.

PART 3: Author Index

Anderson, Karen L.	Jan
Andriulli, John B.	Nov
Ardell, Barry L.	Jun, Sep
Avitable, Peter	Apr
Bailey, Kevin	Sep
Baxter, Nelson L.	Jun
Bender, E. K.	Jan
Benson, Richard	Aug
Berkman, E. F.	Jan
Birchmeier, John R.	Jun
Bouton, Chad E.	Jun
Bradbury, Gene	Feb
Brennan, M. J.	Nov
Byrd, Richard	Oct
Cerrato, Gabriella	May
Chen, M. H.	Nov
Clymer, Richard	Nov
Copley, David	Dec
Corwin-Renner, Dan	May
Crews, Alun	May
Dressler, Klaus	Jan
Dumke, Dick	Oct
Fleuchaus, James	Apr
Foss, Gary	Mar
Frarey, John L.	Nov
Gade, Sven	Jan
Ginn, Bernard	Mar
Glibert, Patrick	Dec
Gram-Hansen, Klaus	Jan
Haselton, David	Apr
Herlufsen, Henrik	May
Hobbs, Gregg K.	Apr
Juang, Jer-Nan	Aug
Koch, Roger	Jun
Landgraf, Michael M.	Feb
Lang, George Fox	Jan, Apr
Lassiter, John O.	Aug
Liefooghe, Christophe	Jan
Lilly, Jerry G.	Dec
Mains, Michael	May
McConnell, Kenneth G.	Jun
McCormick, Richard	Oct
McEvilly, Tom	Nov
Miller, Laymon	Dec
Mitchell, John S.	Sep
Mowry, Jack K.	Jan
Nielsen, Carl	Mar
Pappa, Richard S.	Aug
Peterson, Edward	Oct
Reynolds, A. G.	Nov
Richardson, Mark H.	Jan
Rodamaker, Mark C.	Aug
Roesems, Dirk	May
Rosenberger, Tom	Mar
Rusen, William	Oct
Saha, Pranab	Jul
Saller, Eric	Feb
Sanderson, David	Dec
Schloss, Fred	Feb
Singh, Raj	Oct
Smith, Strether	Mar
Stabley, Robert	Jul
Sutherland, Mark	Dec
Towne, Robin M.	Jan
Tuft, Richard H.	Feb
Ungar, Eric E.	Oct
Vold, Håvard	May
Von Goerlitz, Kurt	Oct
Walter, Patrick L.	Mar
Wasserman, Donald E.	Jul
Weal, Paul	Jan
Welaratna, Sri	Jan
Wentzel, Richard E.	Jul
Wetherill, Ewart A.	Jul, Dec
Williams, Roger	May
Woodard, Stanley E.	Aug
Xu, Ming	Jun
Yeager, David	Aug
Zaffiro, Paul A.	Sep

NEW

High-Speed Recorder

We didn't ask our engineers to design every bell and whistle into our **64-channel recorder**; we only asked it to do three things:

1. **Download and Review** data hundreds of times faster than any recorder in the industry.
2. Allow you to select the exact combination of **Signal Conditioning** functions you want, from F-V, strain, thermo, charge, filter, and more.
3. Produce the most **Noise-Free, Reliable** data of any high-speed multi-channel recorder available.

The fact that our **DATA MAX** System is Network ready, has an NT Operating System and 100 Gb of storage, is easier to use than a tape recorder, and comes in either a portable or rack mounted chassis, was all Engineering's idea...
